

American Indian and Alaska Native (AI/AN) Life Expectancy

A Disease of Injustice

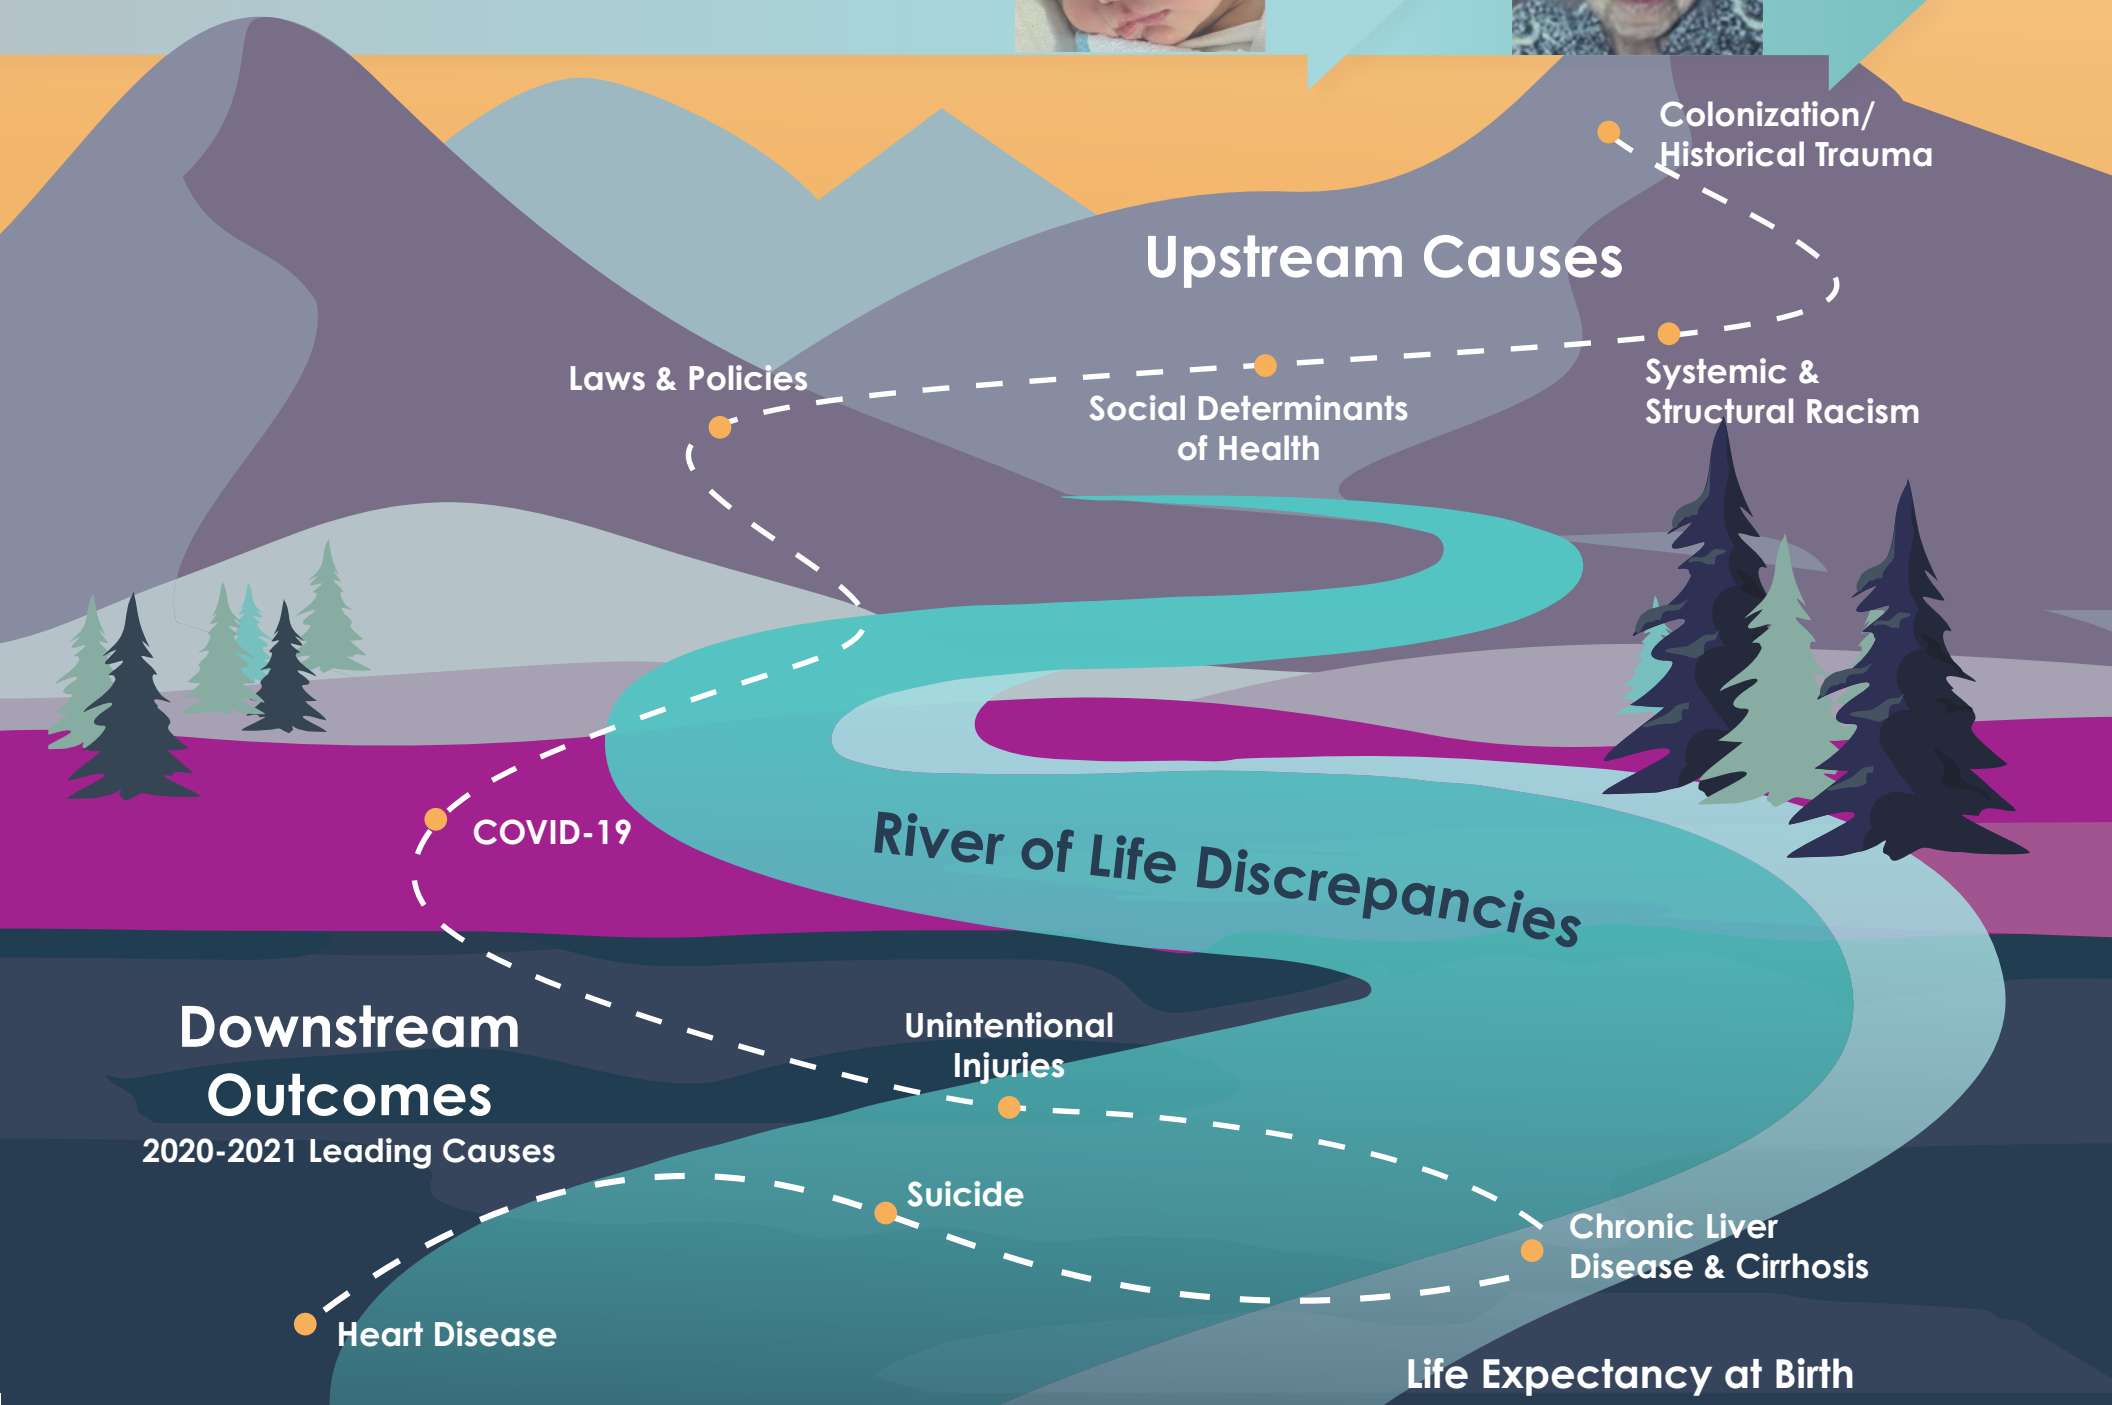

Life Expectancy is a measure of the overall health of a community. Life expectancy at birth is a measure of health status across all age groups.

Newborn
0 Years

Great, Great
Grandmother
106 Years

American Indians and Alaska Natives born in 2021 have a life expectancy of...

65.2 = Life expectancy of the U.S. population in 1944.
years

Life Expectancy at Birth
White vs. AIAN

Year	White	AIAN
2019	78.8	71.8
2020	77.4	67.1
2021	76.4	65.2

A Call-to-Action: Do Something!

Local

Identify resources for tribal-level data collection, analysis, and community engagement.

State

Identify/create laws and policies that increase years and quality of life.

Federal

Convene a national Task Force on AIAN Life Expectancy & Quality of Life and fund implementation of report findings.
